

Week 1 – Team Charter (Phase 1)

Enterprise Systems Design Studio

1. Team Information & Enterprise Roles

Team Member Name: Ainazik Baltabaeva

Assigned Role: Product Manager

Other roles will be finalized after team discussion.

Team Name: Delta

2. Problem Space (High-Level)

Student Enterprise System Involved:

University Course Registration and Academic Planning System

Who Is Affected:

Undergraduate and graduate students at National Louis University

Problem Summary:

Students at National Louis University often experience difficulties during course registration and academic planning.

Many students struggle to understand which courses are required for their major and degree completion.

The current system at NLU does not provide a personalized academic navigator that considers a student's major, academic year, completed courses, and remaining requirements.

Students also lack long-term planning tools that allow them to create schedules beyond one semester.

Additionally, it is difficult to discover elective or interest-based courses using keywords and preferences.

As a result, students may feel confused, stressed, and uncertain about their academic progress.

3. Initial Team Goals (Directional)

1. Design a personalized academic navigation and planning system.

2. Improve long-term course scheduling and degree tracking.
3. Enhance student experience through intelligent course recommendations.
4. Explore mobile tools as supporting features.

4. Ground Rules & Working Agreements

1. Team members will communicate regularly using agreed platforms.
2. All members will attend scheduled meetings when possible.
3. Tasks will be completed on time (or warn in advance about any additional time) and shared transparently.
4. Respectful and professional communication.
5. Conflicts will be resolved through open discussion.
6. Collaborative decisions.

5. Decision-Making & Governance Acknowledgment

We acknowledge that our team will attempt consensus when making decisions. When consensus cannot be reached, the Product Manager will serve as the final decision-maker. Instructor escalation is reserved for exceptional circumstances.

6. Team Commitment
